

"MYNA X" –THE LOW FUSS TRAP

Designed and hand crafted in Australia to help you contribute to the survival of our native birds and marsupials . Light and easy to handle.

Why "the low fuss trap?"

The trap is low fuss because it is a simple matter of placing a bowl of dried dog food and a bowl of water in the trap and locating it on the grass after dark in areas where Indian Mynas and Starlings feed during the day. **Trap where they feed to succeed.**

You then **leave it alone** until after dark the following day. The Indian Mynas and Starlings will make their own way inside. At this point you remove the all wire "foyer", place a large Otto bin liner over the timber and wire section and administer the euthanizing gas.

Once this is done remove the two bolts holding the top in place and empty out the birds . (Note, if placing in your Otto bin you must double bag the birds) Reset trap.

Catches : Call 0438 198 460 and report your catch – you will be surprised at the numbers and how quickly you can clear your area.

Price: \$330 inc GST. Delivery.extra.

Testimonials

We caught seven on day one and three on day two. Native birds appeared on day three. It really works! I am now lending my trap to a friend
Geraldine Baulkham Hills NSW

Congratulations, the MynaX Indian Myna Trap is a credit to you.

This ingenious devious device is so successful in outsmarting those devilish cunning creatures that it has entrapped Indian Mynas each day I have set it.

No other birds have gone near the trap except those bold, thieving Indian Mynas.
Phillip Central Coast

"I caught 38 in 10 days now I have native birds in my yard for the first time in five years" Mrs N. North Rocks NSW

We have caught and euthanized **8** mynas in 3 days. Thank you for your trap our native birds are already coming back
BA Belgrave Vic

You're doing so much for our native birdlife!!!! It's so lovely to see our resident parrots and rosellas not being harassed by the IM's We have another one in the cage now. That's 30 caught.. Keep up the excellent work!
MJS Dural NSW

I would like to say how happy I am with my purchase of one of your TRAPS for the eradication of the Indian Myna birds.... I have eradicated nine birds as of today... I am sold on the advantages of this wonderful trap. Thanks again for such a great invention.
Councillor John Griffiths Baulkham Hills Council

FIGHT BACK IN 2008!

Just letting you know the success that we, at Port Stephens Council, have had recently with the Myna X Trap. Three individual people have trialed the trap and the following are the results we have obtained: Person 1: 14 birds Person 2: 16 birds Person 3: 25 birds This is a fantastic result! Very successful and yes, it really does work.!

Sara Kennedy. Trainee Environmental Health Officer . Port Stephens Council
